EDUCATION

BS Computer Science, Michigan State University
Additional B.A. in Korean

2022 - 2026
GPA: 4.0

Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Web Development, Software Engineering, Operating Systems, Algorithm Engineering

Awards: 2025 6th Annual Midwest Korean Speech Competition Honorable Mention, 2024 Global Korea Awards - Dr. & Ms. Ha Korean Language Scholarship, 2022 - 2023 MSU Promise Endowed Honors Scholarship

TECHNICAL SKILLS

Proficient Python, C++, C#, HTML, CSS, Flask, FastAPI, Jinja, git, Postman, DBeaver
Familiar Unity, Docker, Vue.js, Java Spring Boot, TypeScript, Redis

EXPERIENCE

Full Stack Software Engineer Intern
GE Aerospace

May - Aug 2025
Livonia, MI

- Developed and deployed a new user engagement tracking and analytics system for an externally facing web application utilizing Vue.js, Java Spring Boot, and TypeScript, providing utilization analytics for stakeholders to inform future development decisions.
- Led intern creative team subcommittee to analyze the intern onboarding experience; surveyed current interns to collect feedback and delivered structured, actionable improvement items to program coordinators.
- Improved intern tech committee event engagement by 15% by creating inclusive remote access options for Michigan-based interns.

Information Technology Intern

May 2024 - June 2026
Lansing, MI

Michigan Retailers Association & Retailers Insurance Company

- Provided support and remote device management for in-house and distributed systems improving IT uptime.
- Completed hardware lifecycle and inventory management projects, ensuring proper asset tracking and compliance with security protocols.

TECHNICAL PROJECTS

My VR Language Tutor — [Link](#)

Aug - Dec 2025

Senior Capstone Team Project - Launch by NTT Data, Michigan State University

- Developed an AI-based Unity VR language learning application, focusing on full-stack integrations for Azure based speech analysis, pronunciation assessment, and LLM-driven NPC conversations utilizing C# and FastAPI.
- Awarded one of four prestigious Design Day Awards at Michigan State University.

Enhancing L2 Korean Speaking Through AI

Dec 2025 - June 2026

Undergraduate Research Assistant Project - LiLaC, Michigan State University

- Designed and developed an interactive speech-based AI chatbot with Docker, Redis, and FastAPI for state management along pedagogically informed engagement features for utilization in a study targeting specialized edutech use in Korean L2 spaces.
- Presented research at the 2026 IAKLE Conference in South Korea.

RESEARCH

Structural Inequality and Language Anxiety in Korean English Education: A Gamified, AI-Based Intervention (2026) Faculty-led research project. Selected to present at Yonsei University in Seoul, South Korea as part of the Big Ten Academic Alliance Korean Research Symposium, facilitated by the Nam Center at the University of Michigan.
